

Principled Innovation Continuum

Becoming a Principled Innovator

The practice of principled innovation provides opportunities for individual and organizational development within the moral, civic, intellectual, and performance assets.

The continuum that follows can be used as a reflective tool for individuals, teams, and organizations to identify the degree to which they are currently engaging in the practices of principled innovation and embodying the four assets.

While it appears linear or hierarchical in nature, this continuum reflects the complexity of personal and organizational development through the practice of principled innovation, allowing for natural movement within and between the four assets. Individuals and organizations are always in a state of becoming. New experiences, relationships, situations, interactions, or leadership changes may cause individuals and organizations to regress, reassessing self and systems in order to continue development.

Moral

**Identify and
acknowledge
fundamental
values**

Individual

Acting well in situations that require and ethical response

Rigid interpretation of rules.
Self-oriented.
Absolute and finite thinking.
Sees moral issues as having only two opposing sides.

Become aware of moral dilemmas.
Developing empathy. Beginning to see differing perspectives.

Understanding of individual differences and context variables through a lens of fairness and empathy.

Moving from empathy to compassion with humility. Considers needs of others prior to pursuing action. Willingness to grapple with moral dilemmas through reasoning. Takes action based on fairness.

Supports decision-making from multiple perspectives. Honestly evaluates situations with open-mindedness, integrity and justice. Responds in a meaningful and responsible manner.

Organization

Culture of compassion, joy and service

Fixed systems with a reluctance to change.
Decision making is based on limited perspectives.

Recognition of moral dilemmas.
Developing conditions for collective empathy.
Appreciation of the need for flexibility

Space to grapple with moral dilemmas. Aware of the responsibility and allowing for flexibility to respond to the needs of individuals and groups.

Creates space to be nimble.
Embraces solutions to support unique needs in varying circumstances based on fairness.

Enlightened, committed and clarity of its purpose. Cultivates gratitude and fosters authentic relationships. Listens and values others' opinions. Dedicated to just interaction within the organization and in its interface while systematically supporting the needs of others. Committed to creating a fair and just society for all people

**Utilize moral
and ethical
decision making**
